Profile

Software developer with 8+ years of experience across backend services, games, and real-time 3D applications. Designed and delivered REST API backends for B2B applications in active use, integrating external authentication and managing CI/CD pipelines. Combines Node.js development with extensive Unity and C# experience, alongside university teaching and program leadership.

Technical Skills

Backend and data: Node.js, Express, REST APIs, MongoDB, MySQL, external authentication integrations

Delivery and infrastructure: Docker, GitHub Actions, CI/CD, Linux

Real-time development: C#, Unity, Unreal Engine, WebGL, VR/AR, FishNet, EdgeGap

Industry Experience

Senior Software Developer | Yoloway

Aug 2024 - Present | Prishtina, Kosovo

- Designed and delivered Node.js, Express, and MongoDB REST API backends for museum applications in active use, enabling curators to upload media and manage localized exhibit information.
- Connected backend content with Unity WebGL front ends presenting interactive 3D museum pieces, delivering both the API services and Unity functionality.
- Integrated external authentication services into client applications and built and managed CI/CD pipelines using Docker, GitHub Actions, and Linux.
- Completed development of an e-commerce application; the client did not proceed with launch.
- Developed multiplayer functionality using FishNet and EdgeGap, VR and mixed reality applications, and Unreal Engine simulations. Mentored colleagues in Unity and Unreal development.

Game Developer | Zonda Creative Studio

Mar 2021 - Dec 2022 | Prishtina, Kosovo

- Developed mobile games for Android and iOS in collaboration with publishing partners.
- Built real-time 3D applications using Unity and Unreal Engine, working across game and interactive application development.
- Mentored junior developers in game development practices and supported their contributions to team projects.

Senior Unity Developer | LinkPlus IT

Nov 2021 - Feb 2022 | Prishtina, Kosovo

- Contributed to automotive AR R&D for a global manufacturer, displaying real-time traffic information and points of interest on the windshield.
- Oversaw refactoring of the AR driver-assistance application, with a focus on efficiency and performance.
- Collaborated with cross-functional teams on AR integration and wrote and maintained technical documentation and the user guide.

Industry Experience Continued

Software Developer | Blackout Softworks

Jan 2018 - Aug 2024 | Prishtina, Kosovo

- Developed multiple mobile games for iOS using Unity and C#, collaborating with clients and publishing partners across projects.
- Developed CRUX for Steam using Unity and C#, implementing a custom physics system to support its gameplay mechanics.

Data Generation Monitoring Engineer | Gemalto SA

Jul 2015 - Dec 2015 | Gemenos, France

- Designed and deployed a Zabbix monitoring system for distributed, automated SIM-card production facilities.
- Built PHP and Python tools to collect software performance data and generate monitoring graphs; analyzed results to recommend code improvements.
- Led a test team supporting migration of production-system databases from Oracle to MariaDB.

Teaching and Academic Leadership

Professor | Universiteti AAB

Mar 2023 - Present | Prishtina, Kosovo

- Oversaw the Video Game Development and Animation bachelor program, updating its curriculum to reflect industry tools and practices.
- Taught programming and scripting across all three years, connecting software development concepts with their application in game projects.
- Mentored students through practical game development work, helping them apply classroom learning to software and game development projects.

Adjunct Professor | Western Iowa Tech Community College

Aug 2019 - Present | Sioux City, USA (remote)

- Delivered remote courses in programming and game scripting, using Unity and Unreal Engine for practical instruction.
- Developed curricula and instructional materials around industry tools and game development practices.
- Mentored students through hands-on projects, supporting technical skill development and collaborative problem-solving.

Education

Master's in Telecommunications Engineering | INSA Lyon

Aug 2011 - Sep 2016 | Lyon, France

Five-year engineering program: two years of foundational natural sciences and three years specializing in software development, network engineering, and radio telecommunications.

Professional Development

Introduction to AI | European Business Institute of Luxembourg

Jun - Aug 2024 | Online course in AI model development, including large language models.

Languages

Albanian, English, French, Italian
