Profile

Software and game developer with 8+ years building realtime 3D solutions in Unity/Unreal and scalable backends in Node.js, Express, and MongoDB. Delivered multiplayer (FishNet/EdgeGap) and XR experiences for Oculus and WebGL, and shipped mobile titles on iOS/Android, supported by CI/CD with Docker and GitHub Actions. Academic leader overseeing a university game development program and mentoring engineers, with a track record in performance optimization and training. Earlier engineered production monitoring at Gemalto and led an Oracle-to-MariaDB migration.

Employment History

Senior Software Developer, Yoloway, Prishtina, Kosovo

AUG 2024 – PRESENT

- Developed scalable back-end applications using **Node.js**, **Express**, and **MongoDB**, optimizing automated delivery through **Docker** and **GitHub Actions**.
- Engineered multiplayer networked solutions on **Unity** employing FishNet and EdgeGap, enhancing user engagement.
- Created immersive VR and mixed reality applications targeting Oculus and WebGL platforms, driving innovative user experiences.
- Designed real-time simulations with Unreal Engine, improving project delivery timelines. Trained and mentored team members in software development practices using Unreal and Unity, fostering skill advancement.

Professor, Universiteti AAB, Prishtina, Kosovo

MAR 2023 – PRESENT

- Oversaw Video Game Development and Animation bachelor program, enhancing curriculum to align with industry standards.
- Taught scripting and programming classes across all three years, fostering student engagement and skill development.
- Mentored students in practical applications of game development, preparing them for careers in software and game development.

Adjunct Professor, Western Iowa Tech Community College, Sioux City, USA (remote)

AUG 2019 – PRESENT

- Taught programming and video game scripting courses, emphasizing practical applications using industry-standard tools like Unity and Unreal Engine.
- Developed curriculum and instructional materials that aligned with current industry practices, enhancing students' readiness for careers in game development.
- Mentored students in hands-on projects, fostering a collaborative learning environment that promoted innovation and technical skill development.

Senior Unity Developer, LinkPlus IT, Prishtina, Kosovo

NOV 2021 – FEB 2022

- Contributed to R&D of an Augmented Reality Driving system for a global auto manufacturer, enhancing driving experience with real-time traffic data and points of interest displayed on windshield.
- Oversaw project refactoring, improving the efficiency and performance of AR-assisted driver's aids.
- Collaborated with cross-functional teams to integrate AR technologies, ensuring alignment with project goals and timelines.
- Wrote and maintained the project documentation and user guide

Game Developer, Zonda Creative Studio, Prishtina, Kosovo

MAR 2021 – DEC 2022

- Developed mobile projects for Android and iOS platforms in collaboration with publishing partners.
- Engineered real-time 3D solutions using Unity and Unreal Engine, enhancing user engagement.
- Mentored junior developers, fostering skill development and teamwork in game development.

Software Developer, Blackout Softworks, Prishtina, Kosovo

JAN 2018 – AUG 2024

- Developed multiple mobile projects for the iOS platform using Unity and C#, collaborating with clients and publishing partners.
- Engineered the CRUX Steam project in Unity with C#, incorporating a custom physics system to enhance gameplay mechanics.

Data Generation Monitoring Engineer, Gemalto s.a., Gemenos, France

JUL 2015 – DEC 2015

- Designed, created and deployed a performance monitoring system based on Zabbix overseeing the company's distributed and automated SIM-card production facilities.
- Gathered data on software performance and generated in-depth performance graphs using a custom PHP and Python system.
- Analyzed performance data and suggested code improvements based on performance data analysis
- Lead a test team in migrating the automated production system's databases from OracleDB to MariaDB.

Education

Masters of Telecommunications Engineering, Institut National des Sciences Appliquees, Lyon, France

AUG 2011 – SEPT 2016

Completed a five-year Master's program at INSA Lyon, comprising a two-year foundational curriculum in natural sciences followed by a three-year specialization in Telecommunications Engineering, with balanced coursework across software development, network engineering, and radio telecommunications.

Introduction to AI, European Business Institute of Luxembourg, [online]

JUN 2024 – AUG 2024

Completed a foundational course in development of AI models, including LLMs.
